Protection you can count on.

Durebild® STE

Surface tolerant, high solids epoxy

Durebild® STE is a highly versatile, two-pack, high-solids, surface tolerant epoxy. It is a proven primer on suitably prepared steel and concrete. It can also be used as a tie-coat over previously painted surfaces, as a spot primer over power tool cleaned steel or as an intermediate in a high performance coating system.

Features

- High film build
- Cold Cure hardener for cooler climates
- Quickturn® hardener for faster dry times
- Over 5000 tintable colours available
- Also available in MIO finishes

Benefits

- Can be applied over a wide range of well adhered coatings
- Formulated for exceptional corrosion protection in harsh corrosive environments
- Easy application via spray, brush and roller

Product overview

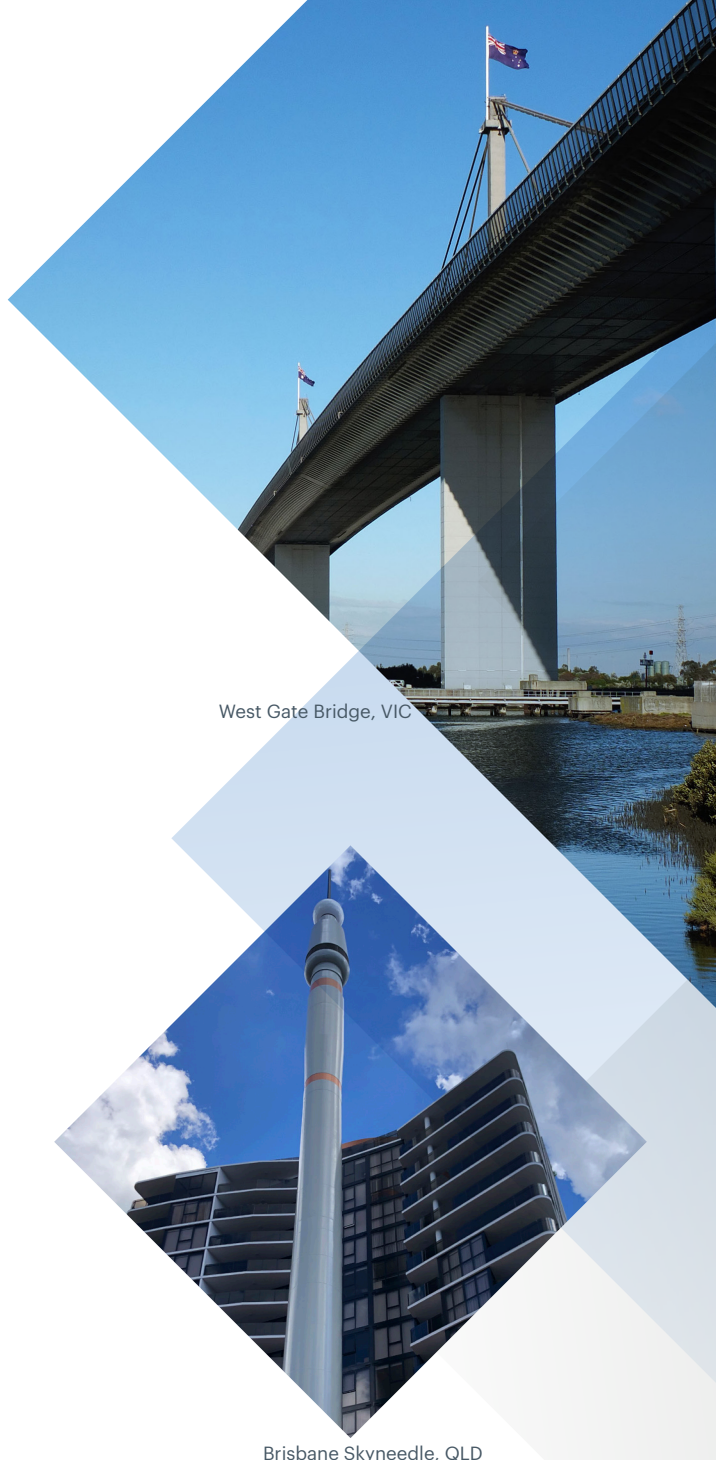

Chemistry	Surface Tolerant Epoxy
Volume solids	84% (White)
VOC level	<230 g/L (White, untinted)
Dry film thickness (min-max)	100-210µm
